

The Flux Report™

Autogas Edition, June 2011

Savings of Autogas vs Gasoline

Based on a fleet of 100 Ford Crown Victorias in Georgia. The fleet was outfitted with a kit to use two fuels. The data are based on actual mileage, fuel receipts and cost to install the dual fuel kit in this fleet. The projections are based for a consumption ratio of 85% **autogas** and 15% **gasoline**.
